

virtual CALL FOR TUTORIALS

The ISMAR 2020 organizing committee invites proposals for tutorials associated with the main conference. The tutorials will be held on **November 9th** as part of a **virtual conference**.

The purpose of the tutorials is to expand the knowledge in the fields of Augmented, Mixed, and Virtual Reality and foster the next generation of researchers, developers, and artists. We encourage researchers from different academic communities, industry and public institutions to target and discuss a specific application area, a distinct research area, or a topic of general interest for Augmented, Mixed, and Virtual Reality.

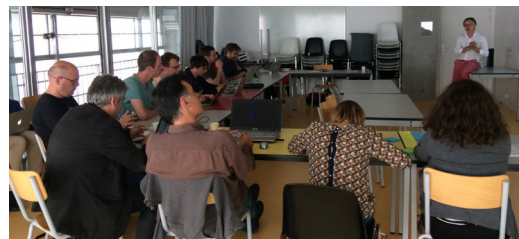

Submission Details and Format

Tutorials organizers need to provide a document proposing the topic area and the scope of the tutorial. Please visit the webpage for further details (<http://ismar20.org/call-for-tutorials/>). Half or full-day tutorials are possible, depending on the scope covered and the available presenters. All tutorials will be held virtually.

Please direct all questions and tutorial proposals to workshops_tutorials_chairs@ismar20.org

Important Dates

- **Proposal Deadline:** Aug 7th, 2020 (23:59 AoE)
- **Acceptance Notification:** Aug 21st, 2020

Benefits of organizing a tutorial

- Introduce and discuss your ideas with leading experts
- Explain and distribute software tools and methods
- Expand the knowledge of the field
- Grow your network & community
- Introduce and discuss novel topics and trends
